

# Assessment Summary

**molly's**  
NETWORK

Tanzania's Non-Profit Accreditation Scheme

## Nipe Fagio

Date assessed: May 2016

Established  
**2013**

Budget  
100,000,000  
TZS

Based in  
Dar es Salaam

Priorities  
Environment

Nipe Fagio's vision is a cleaner, healthier and safer city. The organisation believes that the success of the vision lies in the heart and will of every individual, group or organisation prepared to take action. The mission is to empower individuals, civil society, the private sector and government, to take action toward this shared vision, and 'be the change'.

Dar es Salaam has been ranked as the 12th dirtiest city in the world and this has serious implications for community health, dignity, as well as severe environmental degradation consequences. Nipe Fagio's goal is to raise awareness in Dar es Salaam about proper waste management and supports the community to conduct environmental clean ups.

Nipe Fagio believes that through collaborative efforts we can all promote improved hygiene and sanitation practice, prevent crime, create business opportunities, raise property values, promote tourism and improve community standards with opportunities to enjoy clean, attractive and safer recreational activities.

### Summary from Assessors

Nipe Fagio is an organization with a highly motivated team of staff whom devote their time and experience to affecting positive change in their community. In the areas of Kinondoni where they operate, there has been real evidence of behaviour change and cleaner and safer environments.

In order for Nipe Fagio to achieve its goal, it requires further funds and more efforts placed in resource mobilisation.

● Assessed ● High potential ● Accredited

### Recommendations

The Assessment Panel would like to see terms of references developed for the Board members, which clearly delineate roles and responsibilities. They have also advised to pay senior managers rather than having volunteers at that level.

### Decision

The Assessment Panel would like to see a few issues addressed before they are awarded with Accredited status. For now, they are Almost-Accredited.
